-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 6-7 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-7 have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kallrot (5,992,510). Figures 4-8 of Kallrot discloses a plurality of parallel plates 5 having recesses 22a (Figure 4, column 4, line 66 to column 9, line 13); outermost plates 14, 15; and plate element 16 (right side of Figure 5) having through holes for assembly element 19 and communication with collecting channels 2a in the plates. Regarding claim 2, Figure 5 discloses a clamping element on the left side thereof.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3744

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kallrot (5,992,510) in view of Blomgren (5,307,869).

Kallrot discloses all the claimed limitations except a clamping element in the collecting channel.

Blomgren discloses a heat exchanger comprising a plurality of plates 1; plate elements 2A, 2B, 3A, 3B; and clamping element 8 along the center axis of the collecting channels A-D of the plates for the purpose of strengthening the heat exchanger.

Since Kallrot and Blomgren are both from the same field of endeavor and/or analogous art, the purpose disclosed by Blomgren would have been recognized in the pertinent art of Kallrot.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Kallrot a clamping element along the center axis of the collecting channels for the purpose of strengthening the heat exchanger as recognized by Blomgren.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
